Dear Valued PSI Industries Customer:

Re: Compliance with Regulation (EC) No 1907/2006 of the European Parliament concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

This letter confirms that PSI Industries, Inc. is in full compliance with the European Parliament's Regulation (EC) No 1907/2006, commonly known as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals).

Based on a thorough review of our materials and processes, we can assure you that our aluminum extrusion products do not contain any substances from the Candidate List of Substances of Very High Concern (SVHC) that would require registration under the REACH regulation. Our products are not considered articles that would intentionally release substances during normal and foreseeable conditions of use.

Article 7.1 of REACH mandates that registration is only required for substances in articles if two conditions are met: (a) the substances are intended to be released during normal conditions of use; and (b) the total amount of the substance in articles produced or imported by an entity exceeds one (1) ton per year. For more comprehensive details, please consult the European Chemicals Agency (ECHA) Guidance on requirements for substances in articles.

We trust this statement satisfies your needs. Should you have any additional questions or require further information regarding our compliance with REACH, please feel free to contact us at 972-712-7900 or via email at quality@psiextrusions.com.

Regards,
