

Dear Valued Customer,

Re: Compliance with European Parliament Directive 2011/65/EU - Restriction of Hazardous Substances (RoHS2 Directive) and Directive 2015/863/EU

As you may be aware, the RoHS2 Directive took effect on July 21, 2011, and regulates member states of the European Union. Its primary objective is to address concerns related to certain hazardous substances that may be utilized in the manufacture of electrical and electronic equipment.

Although we are not bound by the RoHS2 Directive, we provide this statement to customers who request our assistance in assessing their compliance with the RoHS2 Directive.

Based on a good-faith diligent inquiry, we do not have any reason to believe that the materials we use or our manufacturing processes intentionally add any substances regulated by the RoHS2 Directive in amounts in excess of the maximum concentration values.

This certification applies to all amendments to the Directive as of the date of this letter, including 2015/863/EU.

A list of chemicals subject to the directive is included as Attachment 1.

Regards,
